BODY PROTECTION & WORKWEAR · REGULAR-USE PPE

Cotton & Polycotton Coveralls

Cotton and polycotton coveralls are one-piece work garments made from woven cotton or cotton-polyester fabric that protect skin and clothing from dirt, abrasion and minor splashes on construction and industrial sites.

TECHNICAL SPECIFICATIONS	
Sizing standard	EN ISO 13688 (general requirements for protective clothing)
Fabric options	100% cotton twill; 65% polyester / 35% cotton
Fabric weight	190 gsm to 270 gsm
Closure	Brass zip with press-stud flap, or full-front press studs
Reflective tape	Optional 50 mm silver tape, typically EN ISO 20471 grade
Sizes	S to 5XL (chest 92 cm to 140 cm)
Colours	Navy, royal blue, orange, red, khaki, grey, white
Packaging	Individually poly-bagged, 20 to 25 pieces per carton

Key features

- 100% cotton twill (240–270 gsm) or 65/35 polycotton (190–245 gsm) fabric options
- Concealed or exposed brass zip front with press-stud storm flap
- Two chest pockets, two side pockets, rear pocket and a rule pocket on the leg
- Elasticated back waist and action-back pleats for bending and climbing
- Optional 50 mm silver reflective tape on chest, arms and legs
- Pre-shrunk, colourfast fabric suitable for repeated industrial laundering

Variants available

- 100% cotton coverall, plain
- Polycotton coverall with reflective tape
- Short-sleeve summer coverall
- Two-piece shirt and trouser set
- Logo-embroidered or printed coverall
- Hi-vis orange coverall with tape

TYPICAL APPLICATIONS	
Building construction	daily workwear for labour camps and site crews
Oil and gas services	general maintenance where FR clothing is not mandated
Facilities management	cleaning, MEP and landscaping teams
Logistics and warehousing	loaders, forklift operators and yard staff
Manufacturing	workshop and assembly-line personnel
Solar and utilities	installation crews in open-air sites

COMPLIANCE, BRANDS AND SELECTION

Compliance (UAE / GCC)

In the UAE, Dubai Municipality and Abu Dhabi OSHAD guidance require employers to provide suitable workwear free of charge, and most main contractors specify long-sleeve coveralls for all outdoor workers to limit sun exposure and minor abrasion. Reflective tape is commonly required on roads, ports and airports. Cotton coveralls are not flame-resistant; where Saudi Aramco CSM or ADNOC HSE standards call for FR clothing in hydrocarbon areas, FR coveralls to NFPA 2112 or EN ISO 11612 must be used instead.

Brands we supply

Vaultex, Empiral, Portwest, Taha Safety, Dickies, Delta Plus

How to choose

1. Choose 100% cotton for breathability in summer; choose polycotton for durability and lower cost
2. Specify reflective tape if workers operate near vehicle movement or at night
3. Order a size mix of roughly 10% S, 25% M, 30% L, 25% XL and 10% 2XL+ for a typical crew
4. Confirm whether the client requires FR clothing before choosing cotton coveralls
